Senior iOS/tvOS Engineer

SUMMARY

Senior iOS/tvOS Engineer with 9+ years of experience developing scalable, high-performance consumer applications using Swift, SwiftUI, and UIKit. Specializes in OTT and media streaming, with hands-on expertise in AVFoundation, AVPlayer, and HLS for live and on-demand playback. Skilled in Swift Concurrency, Combine, MVVM, and Clean Architecture, delivering applications across sports streaming, entertainment, social networking, healthcare, and retail.

EXPERIENCE

Aug 2022 - Jul 2026	Analyst - SD ValueLabs Solutions LLP Hyderabad, TS - Rafr (Sep 2025 - Jul 2026): Developed campus community features, social feeds, and student engagement workflow using Swift, SwiftUI, UIKit, MVVM, REST APIs, and Swift Concurrency. - DAZN (Apr 2025 - Sep 2025): Developed iOS/tvOS sports streaming features for live and on-demand playback using Swift, SwiftUI, AVFoundation, AVPlayer, HLS, and REST APIs. - meWATCH (Jun 2024 - Mar 2025): Developed and optimized OTT video playback features using Swift, SwiftUI, UIKit, AVFoundation, AVPlayer, HLS, REST APIs, and MVVM. - melisten (Aug 2023 - May 2024): Built audio and live radio streaming features using Swift, SwiftUI, UIKit, AVFoundation, and REST APIs. - iBetcha (Aug 2022 - Jul 2023): Implemented peer-to-peer betting workflow and reusable UI components using Swift, UIKit, MVVM, REST APIs, and asynchronous networking.
Sep 2019 - Aug 2022	SENIOR SOFTWARE ENGINEER Indium Software India Limited Chennai,TN - Omnicare Now (Jun 2021 - Aug 2022): Developed and maintained secure telemedicine features, including real-time voice/video consultations using Agora SDK and VoIP, network-aware communication across Wi-Fi and cellular connections, and secure patient and vital-data workflow. - Carro World (May 2020 - Jun 2021): Developed an online supermarket app integrating barcode & voice search. - ADHM, Powai Run (Jun 2020 - Aug 2020): Developed reusable white-label marathon apps for 5K, 10K, and 21K events with GPS-based location tracking, Google Maps integration, dynamic polyline rendering, and real-time route and distance tracking. - Skreens Skybox (Jan 2020 - Jun 2020): Created a cloud video platform for personalized streaming. - Skreens PRO Application (Oct 2019 - Dec 2019): Skreens PRO is a cloud video platform that allows you to create or watch hyper-personalized, ultra-low latency streaming broadcasts. - Tabi Audio (Sep 2019 - Dec 2019): Tabi Audio gives you engaging narrations about Senso-ji and other destinations in Japan making your trip worthwhile.
Feb 2017 - Sep 2019	SOFTWARE ENGINEER Benseron Hospitality Chennai,TN - Linga POS (Feb 2017 - Sep 2019): Developed and maintained a cloud-based restaurant Point of Sale (POS) iOS application using Swift and UIKit, supporting order management, restaurant workflow, transaction processing, and multiple payment integrations. Contributed to feature development, UI enhancements, bug fixing, performance improvements, and production support. - Linga CDS (Jun 2017 - Sep 2019): Developed a Customer Display System (CDS) iOS application using Swift and UIKit, enabling customers to view order details, pricing, and transaction information in real time during checkout. Implemented UI components, business logic, data synchronization, and integration with the POS ecosystem. - Linga Insights (Oct 2018 - Jan 2019): Designed analytics tools for tracking store performance.

EDUCATION

Apr 2011 - Jun 2014	BACHELOR OF SCIENCE IN COMPUTER TECHNOLOGY Paavai Engineering College Salem,TN
---------------------	---

SKILLS

Programming Languages: Swift, Objective-C, Kotlin, TypeScript |

UI & Apple Frameworks: SwiftUI, UIKit, Combine, Auto Layout, Programmatic UI, Core Data, SQLite, RxSwift |

Architecture & Design Patterns: MVVM, MVC, Clean Architecture, SOLID Principles, Dependency Injection, VIPER |

iOS Development: iOS/tvOS Application Development, Apple Human Interface Guidelines, App Store Deployment, App Lifecycle, Deep Linking, Push Notification

Media Streaming & Playback: iOS/tvOS, AVFoundation, AVPlayer, HLS, Adaptive Bitrate Streaming (ABR), Live & VOD Playback, DRM, FairPlay Streaming (FPS), Playback Optimization, Buffering & Error Handling

Networking: REST APIs, GraphQL, URLSession, JSON Parsing, Swift Concurrency (async/await), GCD, Multithreading, Sendable |

Performance & Debugging: Memory Management, Performance Optimization, Instruments, Debugging |

Frameworks & SDKs: MapKit, Google Maps SDK, CallKit, Push Notification, Local Notification, Agora SDK, Braze SDK, VOIP |

Tools & CI/CD: Xcode, Git, GitHub, GitHub Actions, Jenkins, Android Studio, VS Code |

AI Coding Agents & Assistants: Codex, Claude Code, Gemini, GitHub Copilot, and Aide; AI-assisted development, context-aware prompting, code generation, refactoring, debugging, and test generation.

Testing & Development Practices: Unit Testing (XCTest), UI Testing, Integration Testing, Mocking, Code Reviews, Debugging, Agile/Scrum, CI/CD
